- 1) The Geometry Code Screensaver/Meditation Tool now available!

Mika Feinberg and I just finished a collaboration we started last fall on a Screensaver/Meditation Tool called The Geometry Code. The Windows version is available NOW, and the Macintosh version will be available in a few days. Hooray!!! :-)
We're both quite pleased with the results and imagine you will be too! I've posted details on my new website:

<http://www.geometrycode.com>

Here's an excerpt from the text I wrote for the new web page:

The popularity of videos such as "What The Bleep" and "The Secret" indicates that humankind is
longing to remember the truths, laws, principles and wisdom that is Universal,
Timeless, Eternal,
Omnipresent, Unchanging, and Natural.

There's no secret that the wisdom of these principles resides eternally within the heart of each soul and each atom in the Universe ...

(There's not much on the new website yet except the home page, but I will be adding a lot more soon, and I wanted to let everyone know that the long-awaited screensaver is available now! The new website will be expanding rapidly over the next few weeks...)

Soon, the companion book, "The Geometry Code" will be available (my muse is working overtime :-)

I wrote a short booklet for the screensaver explaining the significance of each of the geometric symbols, which beautifully represent and illustrate the seven Hermetic Laws of Nature, and are documented in the book, The Kybalion. These will be expanded upon in The Geometry Code book in even greater detail.

Mika also has created several other exquisite screensaver/mediation tools which

highlight crop circles (Sacred Gaiametry), mystical symbols of various cultures, such as Hanta Yo (Native American), and (Tao & Dharma) oriental mandalas, etc. For a sample of LightSOURCE, the original screensaver (partly inspired by Sacred Geometry Design Sourcebook), see the top of my links page:

=====
2) Sacred Geometry Design Sourcebook now available direct from Lulu.com !!!
<http://www.lulu.com/content/583170>

2007 Calendars of "Solar System Geometries Per Martineau"
-- still good for 2007! Hey, there's still 10 months left in 2007! :-)
<http://www.lulu.com/content/517309>
<http://www.lulu.com/content/521213>

The "Solar System Geometries Per Martineau" zazzle prints (all the way up to 78" x 52" at 100dpi),
greeting cards and fully customizable apparel are still available, too, in case you like a particular image:

<http://www.intent.com/posters/Martineau/index.html>

*See my Events page for current exhibits of some of the giclée prints in southern Oregon here:

3) Check out my blog! ... Now updated daily!

<http://www.brucerawles.com>

Here's a quick list of recent topics I've uploaded posts about:

Ivan Najera - great latin guitar!
Sacred Geometry - Polyhedra Models
Klamath Basin National Wildlife Refuge
Conversations With God - DVD
Support Human Caring for Earth's Climate
An Inconvenient Truth - Digital Download version!
A little cosmic perspective for humility ... and not taking things too seriously!
Kudos for the Holoenergetic Healing work of Dr. Leonard Laskow
Visionary Activist: Caroline Casey
U.S. vs. John Lennon
Neat videos
Response to Pendulum Query - Harmonograph
Alex Grey's Visionary Artwork
Interesting RVML presentations - Catherine J. Larkin & Carl Marsak

Hedgehog Concept Trinity re-framed
Ashland Chocolate Festival & Dagoba of Ashland
2nd Annual Northwest Labyrinth Gathering - May 18-20, 2007
Healing with Love by Dr. Leonard Laskow
The Silent Gospel by James Andrew Barrett

Thanks to both Glen & James for pointing out this neat article on the advanced math of Islamic Art:

<http://www.nytimes.com/2007/02/27/science/27math.html?ex=1173243600&en=d263654a34a4a600&ei=5070&emc=eta1>

Here's a press release for geometry enthusiasts from Robert Webb:
(looks like a great update for this interesting looking software; another enticement to get an Intel-based Mac, I suppose)

I just released version 4.0 of Stella, plus a new product called Stella4D. It includes everything from Great Stella, but also includes support for 4D polytopes! Watch a tesseract (4D cube) undergoing 4D rotation. Watch 3D cross-sections of 4D polytopes animating as the slicing hyperplane cuts deeper and deeper. All 1849 known uniform 4D polychora are included, plus more! :-)
Home page:

<http://web.aanet.com.au/robertw/Stella.html>

Get the demo of Stella4D here:

<http://web.aanet.com.au/robertw/Downloads.html>

See a bunch of screenshots, including animated ones, here:
